Angle Grinder

500 cuts in concrete. This 300mm diamond blade is an economical option for those short-lived contracts.

It's easily identifiable with distinct markings and has 10mm sintered segments. Outlasting its low-priced rivals makes it a winner, all round.

Check before use:

- The diameter and bore size are correct for the machine
- The blade is in good condition with no cracks or segment damage
- The flanges on the machine are equally sized
- The machine does not exceed the RPM marked on the blade
- The rotational arrows on the blade are correct in relation to the machine

Check during use:

- The blade is free of segment damage or steel core cracking
- The blade is not overheating
- That excessive pressure is not being applied
- The material is not too hard for the type of blade
